

ReactJS

- ↳ Why what framework state, props
- ↳ Hooks
- ↳ least forms
- ↳ least rendering

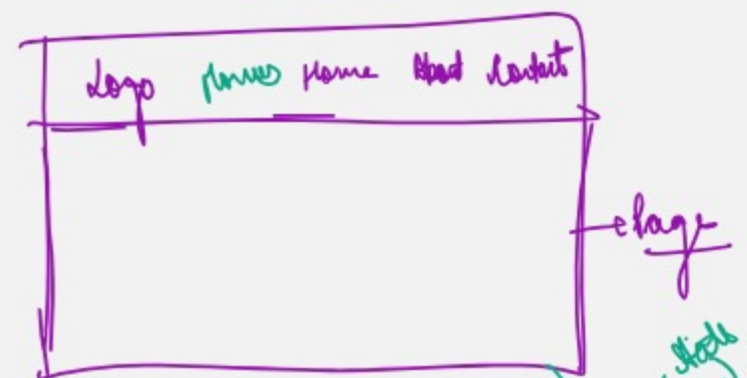

(C.R.) / (Vite)

→ folder structure with
→ least content (examback)
→ reduce (extra Management)

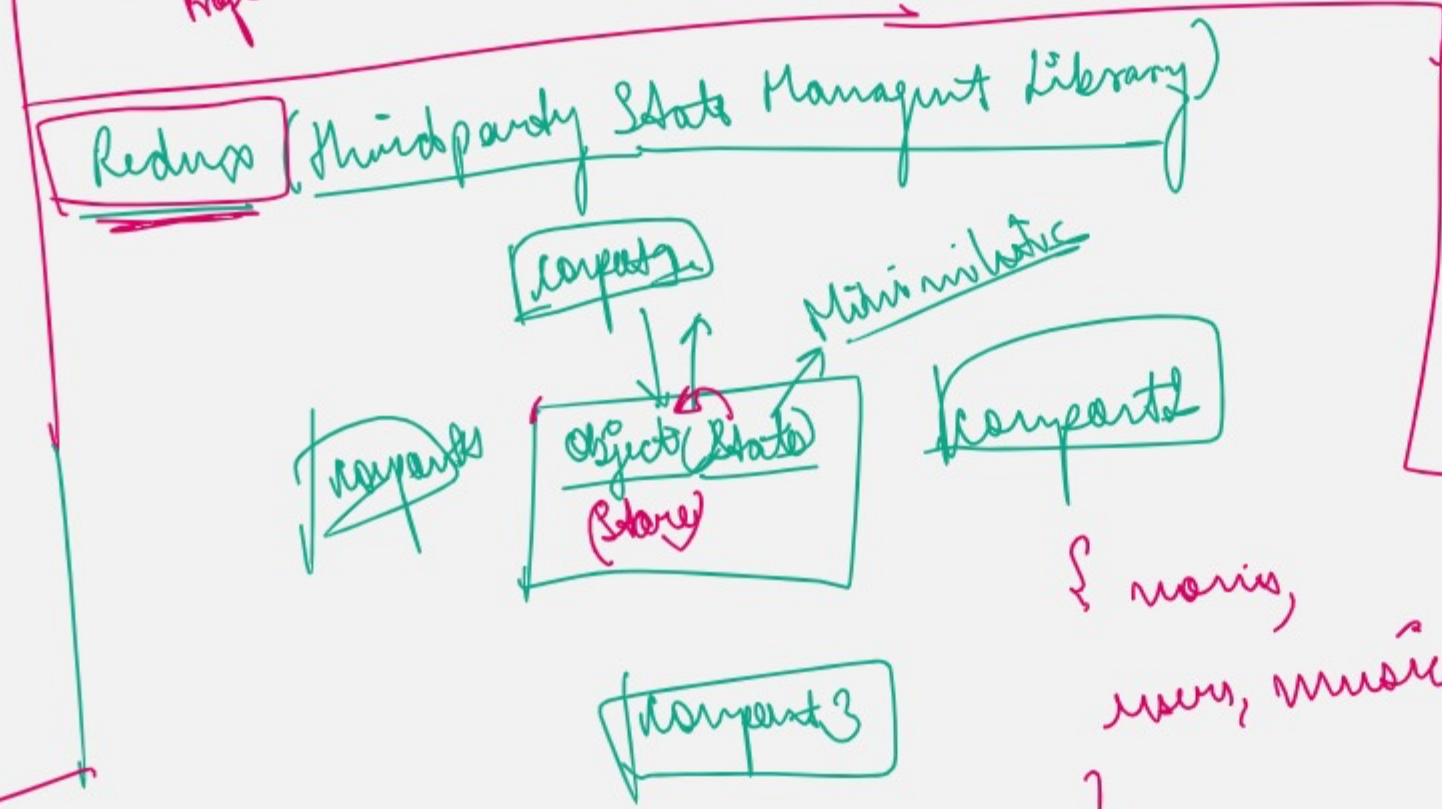

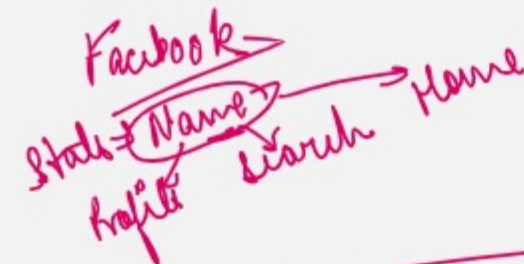

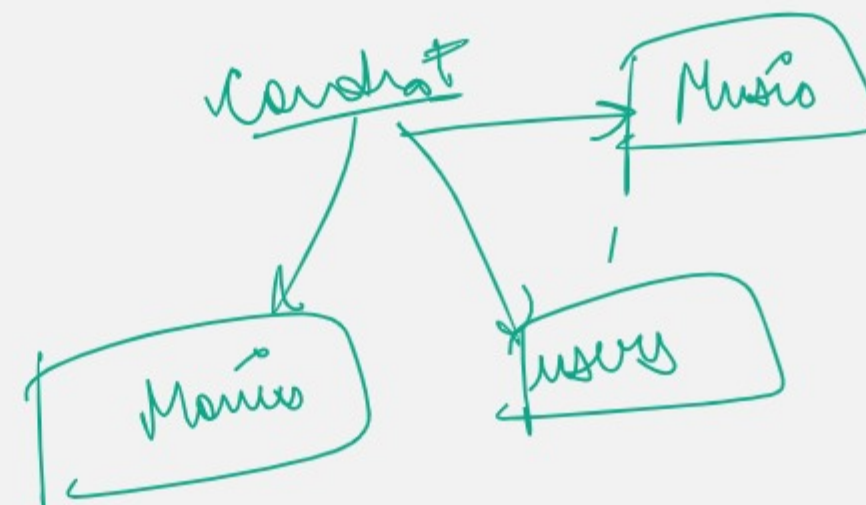

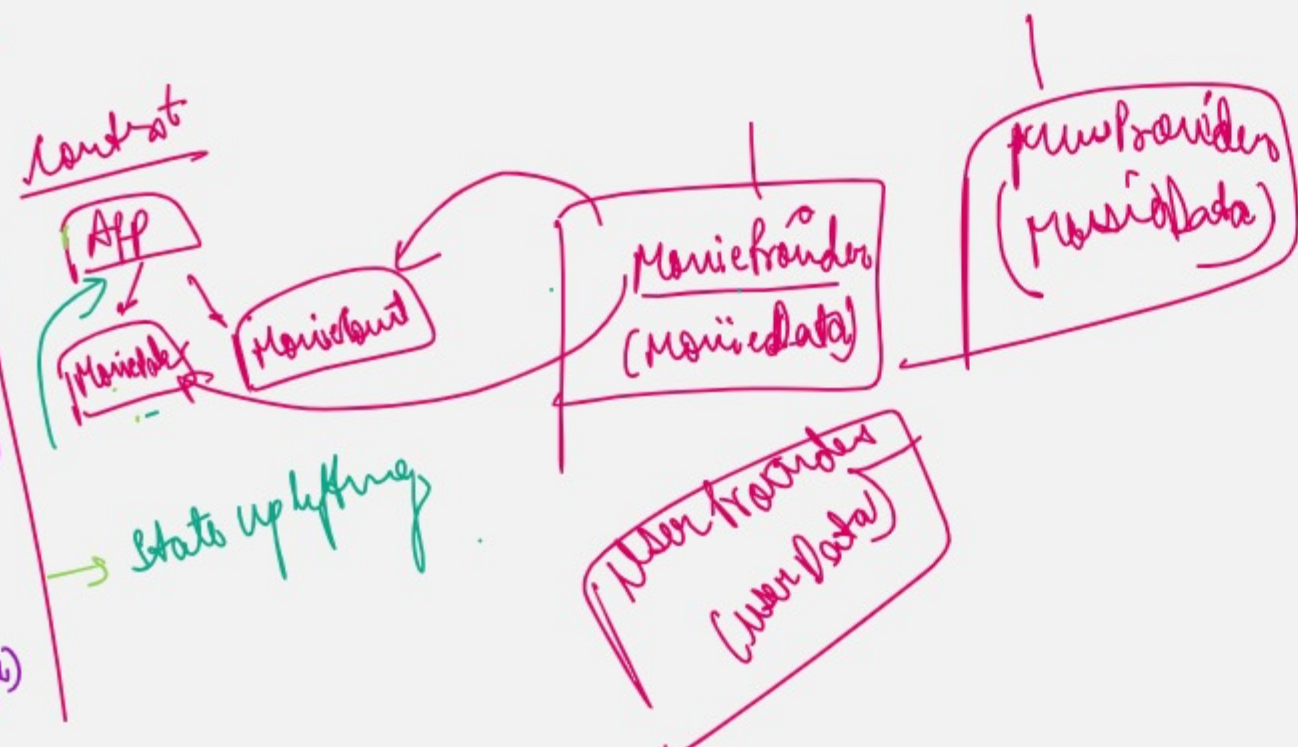

CPA vs UITS development tool
→ grade marks
→ towards the cummulative tools
→ is facts
→ like

- Webpack
- Bundling is slow
- slower
- only react
- only js
- rebuilds everything
- unusable in production
- use a dev process like parcel
- development of react
- pure js
- not
- reactjs (webpack)

explained (7-8 steps)
SWC + Spady Web n

- Snapshot App
- Provider (dependent)
Lifecycle / state (owner)
- consumer
is dependent (consume the in-
data)

alt: Receipt, Redox toolkit
